

POULTRY INCINERATORS

Expertly manufactured
for your poultry waste

Efficient

Ecofriendly

No Smoke

No smell

No waste

New!

NO WASTE

YTTK Poultry incinerators reduce waste to >3% ash. Poultry waste is thoroughly sterilised with 600-700 deg.C of heat. As such on farm incineration, is the only recognised bio secure method for managing waste on site effectively and cleanly.

NO SMELL

3-5 minutes after starting proces, there is no smell

NO SMOKE

3-5 minutes after starting process as opposed to conventional chicken burning boilers, there is no smoke

ECOFRIENDLY

If you want to replace everyday essentials with eco-friendly alternatives without any inconvenience, YTTK incinerators are now with you

EFFICIENT

It takes only 25-30 minutes to destroy your waste with %3 ash

YTTK 50 • YTTK 100

GAS or DIESEL

YTTK - Standart

COAL

YTTK 50 Technical Specs

Combustion Chamber Volume (m ³)	0.282 m ³
Burn Rate*	up to 50 kg per 1/2 hour
Average Fuel Consumption	7/10 lt gas per ½ hour (According to the oil density)
Operational Temperature	850 - 1100 °C
Average ash residue (%)	3%
Thermostatic Device	Yes
External Length	2400 mm
External Width	900 mm
External Height	3880 mm
Shipping Weight	1010 kg

WATERY CHIMNEY SYSTEM

developed by Yağmur Teknik

Repeated odorless burning by filtered organic particles thanks to the watery chimney system developed by YAĞMUR TEKNİK

**Subject to calorific value of waste stream. For reference only, not to be used for installation purposes.*

** The resulting hot water due to the resulting high heat can also be used for different purposes*

** After the use of the product, it is not recommended to run it for the second time without waiting for the hot water generated to cool down.*
